NO TIME TO READ MY WHOLE RESUME? JUST READ THIS SUMMERY

I am 26 and a self-learning-lover and a geek who was a free lancer for over 6.5 years, i'm a full stack web developer and i don't care if i should struggling with a project which is dealing with servers, databases and sockets in back-end side ,front-end technologies, building softwares for computers with Electron-js or building progressive-web-apps for mobile devices or even system administrations stuff cause literally i love them all

I appreciate it if i have a range of responsibilities instead of a single boring and repetitious task everyday and that was the main cause that always prevent me from working for an incorporation as an employee

recently i figured out that it's better for me to do so cause it makes me expert in a specific field instead of doing everything but giving it up Incomplete...

- anyway i have 4 years social security organization insurance premium records paper. (can be proved)
- i also have my own incorporation which name is "afraz andish archin" right now (can be proved)
- i am graduated from Bu-Ali sina university and i'm working from my own office in paradise-hub complex in tehran book garden branch so i strongly prefer "telework"

HOW CAN YOU TRUST "I CAN"?

SKILLS

general english language level:

speaking:

★★★★☆

listening:

★★★★★

reading:

★★★★★

writing:

★★★★☆

what is your main programming field?

web development

what is your main programming languages?

PHP & javascript

how do you design a back-end?

what Languages?

i usually prefer PHP and javascript and correspondence libraries

what web servers?

apache (common), node.js (sometimes), nginx (just tested it one time but has no real implementation yet)

what databases?

MySQL (common), MongoDB (sometimes), redis (just tested), cassandra (just tested)

what protocols/APIs/technologies?

HTTP, STOMP, HTML5 Protocols (WebSocket, SSE(yet learning about it), ...), webRTC (yet learning about it)

what operating systems?

windows, macos, linux

how do you develop a web client application/game:

HTML, CSS, javascript, jquery, react, bootstrap/c# and unity

i'm not going to refer to my work experiences or university degree or social security organization insurance premium records paper or etc. you may see my answers and reputations in stackoverflow or you may examine my github furthermore for the jobs that i apply first employer may test me for 2 weeks for free but i'll consider those two weeks salary if i hired later by him

PERSONALITY

who are you?

i am a 26 years old full-stack developer, i'm not calling myself a 'senior developer' to disclaim about having many skills that a real senior-developer has but truth be told i've great experience and **put it aside i can come up with up & running every technology very fast even if i had no prior experience in it** (cause as i told you, i am a self-learner and i love my job)

i am a flexibile man but a serious not a funny one

- i am open to criticism
- i take care to reasonable suggestions and will implement them even if it was against my prior view
- i am totally responsible for my tasks
- i take too much care about code performance and readability
- i take too much care to respect everyone and being respected by them vice versa
- i am a trustable person to keep companies secrets

who you are not?

- talker
- spoofer
- cheater
- claimer (or pretender)

GENERALS:

Email	ashkan.nasirzadeh@gmail.com
Mobile	(+98)9122061910
Phone	021-22909026
Website	ashkan-nasirzadeh.ir
Website	article-world.ir (both are private actually)

how do you develop a desktop client application/game?
electron.js/c# and unity

how do you develop a mobile client application/game?
flutter/c# and unity

how do you develop a progressive web application?
javascript

have you read "clean code by Robert C. martin"?
yes

solid programming?
yes

Testing:
jsut tried "jest" for javascript

Embedded:
Arduino (learning yet)

EDUCATION

Bu-Ali Sina University - bachelor degree
Graduated on May, 2019

EXPERIENCE

sazeh-komak - 4 years - 2016 up-to 2020

task/position:

- full-stack developer responsible for building saze-komak dedicated website, PWA, support software on Microsoft windows platforms
- IT support

achievement:

i started as somebody who can write codes that just works but raised to someone who can write high-performance, readable, standard and expandable programs
